

REQUEST FOR PROPOSAL RESPONSE

1000 Friends of Oregon — Website Redesign

Submission Deadline: **10 August 2026**

Prepared by **Korvia Studio** for 1000 Friends of Oregon

Contact: Edward Mathew · emathews924@gmail.com

WhatsApp: +255 682 087 992 · Dar es Salaam, Tanzania

Concept demo	https://oriondrayke.github.io/korvia/presentations/1000friends-concept.html
Portfolio	https://oriondrayke.github.io/korvia/
Date prepared	31 July 2026

1. Company Profile

Korvia Studio is an independent full-stack web design and development practice led by Edward Mathew, based in Dar es Salaam, Tanzania. We design, build and maintain websites and digital platforms for mission-driven organisations, with a focus on clarity, accessibility, long-term maintainability and measurable results.

Our work spans NGOs, public-sector bodies, trade agencies and social enterprises across Africa, Europe and North America. Every site is hand-built around the organisation's audience and goals rather than bolted onto a generic template.

Core capabilities

- Responsive web design and user-experience strategy
- CMS implementation on WordPress, Drupal and modern static stacks
- Accessibility, performance and security hardening
- CRM, donation, newsletter and advocacy-form integrations
- Content migration, staff training and documentation
- Ongoing hosting, maintenance and support retainers

Why 1000 Friends of Oregon is a strong fit

We understand advocacy organisations that must turn complex policy work into clear public messaging. The proposed redesign addresses the exact friction points raised in the RFP — limited navigation, buried content, disconnected news and a backend that is difficult for non-technical staff — with a modern, staff-friendly platform.

2. Technical Proposal

Our proposal is to redesign and rebuild the 1000 Friends of Oregon website on WordPress, delivering a modern, accessible, easy-to-manage platform that connects supporters to action. The project will launch by 30 October 2026.

Current digital landscape and opportunity

The current Drupal site, built in 2017, has served the organisation well but now limits its ability to communicate urgency and impact. The RFP identifies three core challenges — buried information, static programme pages and weak action funnels — which we treat as opportunities to build a more effective advocacy engine.

Platform and architecture

- **CMS:** WordPress with a custom-built lightweight theme for full design control and easy staff updates
- **Responsive design:** Mobile-first, accessible and performant across devices
- **Hosting:** Managed DigitalOcean cloud server with SSL, automated backups and uptime monitoring
- **Security:** SSL, security headers, role-based access, regular core/plugin updates and backup testing
- **Search & discovery:** Robust site-wide search, filtered resource libraries and SEO-ready structure
- **Marketing readiness:** XML sitemap, search-engine indexing setup, Google Search Console integration and performance optimisation

Design approach

The design will use an Oregon-inspired palette — deep forest greens, meadow tones and warm earth accents — paired with highly readable typography and generous white space. Navigation will be flat and topic-driven, with persistent calls to action so every page leads somewhere: donate, subscribe, sign an alert or share a story.

Key deliverables

- Approximately 50 public-facing programme and issue pages
- Home page with dynamic hero, latest news and priority actions
- Blog migration: posts from 2022 onward, archive links for older content
- Publications library with downloadable PDFs and issue tagging
- Events calendar and event detail pages
- Donation flow integrated with Stripe and Salesforce
- Mailchimp newsletter sign-up across the site
- Soapbox-powered action alerts, petitions and inquiry forms
- Partner and donor recognition pages
- Staff profiles and board/committee listings
- Multilingual-ready structure for future expansion
- WCAG 2.1 / 2.2 accessibility compliance
- Security audit, launch checklist and staff training

Concept demonstration

An unofficial concept page has been prepared to illustrate the proposed direction:
<https://oriondrayke.github.io/korvia/presentations/1000friends-concept.html>

3. Financial Quotation

All figures are in United States Dollars (USD). Costs are itemised transparently so 1000 Friends can verify infrastructure charges directly with the providers listed.

Item	Basis	Amount
DigitalOcean droplet (1 year)	\$64/mo × 12	\$768
Server setup, monitoring & SSL renewal	Management fee	\$332
Domain name (.org, 1 year)	Registration + renewal buffer	\$100
Domain / DNS / SSL configuration	DNS, email records, security headers	\$400
Consultation + demo page iteration	Until final design approval	\$100
Design & development	Custom theme, pages, CMS, integrations	\$3,400
Training & documentation	Included	\$0
First-year maintenance	Included	\$0
	Total first-year investment	\$5,100

Annual maintenance renewal (from year 2)

\$1,000/yr

Payment schedule: 30% on contract signing, 40% on functional site delivery, 30% on final approval, training and launch.

4. Implementation Schedule

The project will run from early September to late October 2026, aligned with the RFP timeline.

Phase	Activities	Deliverables
Week 1–2	Discovery, content audit, sitemap, design mockups	Approved sitemap, design direction, content matrix
Week 3–5	CMS setup, theme development, page build, integrations	Functional website with all pages and features
Week 6–7	Content migration, blog setup, forms, testing	Populated staging site, QA report
Week 8	Revisions, accessibility review, staff training, launch	Live website, training session, documentation

5. Portfolio of Previous Work

The following concept pages and live projects demonstrate our approach to mission-driven, accessible, easy-to-manage websites.

Project	URL	Notes
1000 Friends of Oregon — concept	https://oriondrayke.github.io/korvia/presentations/1000friends-concept.html	Advocacy website redesign concept for Oregon land-use nonprofit.
LACD Liberia — concept + proposal	https://oriondrayke.github.io/korvia/presentations/lacd-concept.html	NGO institutional website concept for Liberian community development organisation.
Westcountry Rivers Trust — concept	https://oriondrayke.github.io/korvia/presentations/wrt-concept.html	Fundraising-ready website concept for UK rivers conservation charity.
Senior Services of SE Virginia — concept	https://oriondrayke.github.io/korvia/presentations/seniorservices-concept.html	Accessible redesign concept for US senior-services nonprofit.
Missouri Technology Corporation — concept	https://oriondrayke.github.io/korvia/presentations/mtc-concept.html	Brand refresh and website redesign concept for US technology agency.

6. References

Live projects referenced below were designed and built by Korvia Studio. Further detail on each engagement is available on request.

Project	URL	Description
Atlas Digital Vault	https://atlasdigitalvault.app/	Zero-knowledge encrypted document vault built for secure storage of passports, land deeds and school transcripts across Africa.
DukaOS	https://dukaos.com/	Point-of-sale and shop-management platform for small retailers in Tanzania; handles sales, stock, debt and staff.
High Hope Daycare & Pre-School	https://highhopedaycare.com/	Website for an early-learning centre in Dar es Salaam with admissions, programmes and contact information.

7. About This Proposal

This proposal is prepared in response to the 1000 Friends of Oregon website redesign RFP. The concept demo, portfolio and references are provided to support the proposal. Korvia Studio operates as a registered independent web development practice and will supply any additional documentation requested during evaluation.

Submission confirmation

This proposal is submitted electronically in PDF format to rfp@friends.org with the subject line Website Design Proposal. We welcome the opportunity to discuss any aspect of the response and are available for a call at 1000 Friends' convenience before the 10 August 2026 deadline.
